Medical Directors and Medical Advisory Committees

BCBSTX Medical Directors are located throughout the state. They provide physician support for BCBSTX quality and health management programs, including care management, medical policy, credentialing and recredentialing, quality of care review, and pharmacy.

BCBSTX has two statewide peer review committees whose primary responsibility is to review the credentials of new providers being credentialed and of established providers who are undergoing recredentialing. They are the Texas Medical Advisory Committee (TMAC) and the Texas Peer Review Committee (TPRC). The TMAC and TPRC members are practicing physicians and other health care providers who also participate in networks serving subscribers of BCBSTX health programs.

The committees are chaired by the Medical Director, Health Care Quality and Policy. Other medical directors who are assigned responsibilities in the credentialing and recredentialing process also sit on the committees. Each committee meets monthly. Meetings are conducted by telephone conference call to accommodate the statewide distribution of the committee membership.

In addition to peer review of credentialing and recredentialing, the committees provide oversight of the quality of care process and as requested provide review and feedback on clinical matters such as clinical practice guidelines, utilization review criteria, and quality improvement initiatives.
